Welcome to the Admin Tool

Welcome to the Admin Tool

This multi-product tool enables you to install and administer various Synopsys Logic Modeling products.

All Admin tool and product documentation—including online help—is provided in PDF format. PDF documentation must be viewed using the Adobe® Acrobat® Reader. For information about the Reader—such as the *Reader Online Guide*—you can use the Reader's Help pulldown menu.

For your convenience, you should leave the current Acrobat Reader session running to enable easy access to the online documentation. Of course, you can minimize the Reader window in order to use all of your screen when you are not reading online documentation. You can click on the **Close** button to dismiss this file and leave the Reader running.

The *Guide to SmartModel Documentation* provides links to all SmartModel online documentation. If you are running the Admin tool off the CD-ROM, click here. If you are using the network-installed Admin tool, click here.

Close

Choose Directory Help

This dialog box is a general-purpose navigation aid that allows you to do one of the following:

- Locate and specify the CD-ROM or network location from which to install models.

- Locate and specify the location of your LMC_HOME.

SmartModel Library users who want more information about installing models can refer to the *SmartModel Library Administrator's Manual.* If you are running the Admin tool off the CD-ROM, click here. If you are using the network-installed Admin tool, click here.
