Open Configuration File Help

Use this dialog box to display the contents of a custom or default configuration (LMC) file.

You can control the following functions when opening a configuration file:

- **Filter**—file name or file extension to be used when searching for the configuration file.

- **Directories**—list of directories to select when searching for configuration files.

- **Files**—list of files that meet criteria in the Filter field.

- **Selection**—path name for the configuration file.

SmartModel Library users who want more information about configuration files can refer to the *SmartModel Library User's Manual*.
